Ratings

“Strong asset quality, benefitting from guarantees and insurance”

“Moody's assesses government support to be very high for all SEK's debt classes”

“The commitment as an owner and the proven support by the Swedish government to SEK result in our assessment of a very high probability of government support for SEK's senior, junior senior (often referred to as senior non-preferred) and subordinated debt classes”

“Moody's expects that that the Government of Sweden would inject capital - if needed - well ahead of any potential breach of SEK's minimum regulatory requirements, significantly reducing the risk of loss to all creditor classes”

January 19, 2021

MOODY'S
Aa1 (stable)

“... that there is an extremely high likelihood of the Swedish government providing timely support...”

“Its elevated capital ratios reflect its high-quality loan book and associated guarantees, highly rated exposures in its liquidity portfolio, and superior capital base consisting solely of core capital.”

“In our view, the company will remain an important pillar of Swedish exporters' success owing to its strong relationships with the country's largest exporters.”

Financial information as of September 30, 2021

Total assets	USD 37.6 bn
Lending	USD 26.1 bn
Common Equity Tier 1 capital ratio	22.6%
After-tax return on equity	5.2%

As of September 30, 2021

A satellite view of Earth from space, showing the curvature of the planet and city lights at night. The image captures the horizon of the Earth, with a thin blue line of the atmosphere separating the dark, star-filled space from the illuminated surface. The surface is covered in a dense network of golden-yellow lights, representing urban areas and infrastructure. The lights are concentrated in certain regions, forming a complex pattern of interconnected nodes and lines. The overall scene is a high-contrast, wide-angle shot that emphasizes the global scale of the data being presented.

MREL

SEK is a systemically important export vehicle

As a credit institution SEK is subject to financial regulation, although 100% owned by the Kingdom of Sweden.

SEK is deemed systemically important for the Swedish financial system and is therefore subject to MREL (Minimum Requirement for own funds and Eligible Liabilities).

MREL is the European equivalent to TLAC and applies to all systemically important banks as well as financial institutions.

BRRD2 was implemented into Swedish law as of July 1st, 2021.

We expect the resolution authority to update SEK's MREL requirements accordingly during Q4 2021.

SEK's requirements*

MREL requirement is currently 7.0% (SEK 23 bn – around USD 2.6 bn) based on Total Liabilities and Own Funds.

Already in compliance with the MREL-requirements with own funds and eligible senior unsecured bonds.

*Before BRRD2 was implemented into Swedish law

Strong capital position

SEK's own funds provide a significant buffer for investors

- Substantial own funds: SEK 19.8 bn (around USD 2.3 bn)
- Actual buffer against CET1-requirement: 12.0%
- Actual buffer against total capital requirement: 6.9% (which is in excess of SEK's management buffer: 2-4%)
- Potential to further increase Total Capital Ratio by 5.1% to 27.7% by issuing AT1 and T2 capital

As of September 30, 2021

Risk exposure amount: SEK 88 bn (USD 10 bn)

SNP issuance plan – small part of total issuance and outstanding debt

SEK expects SNP issuance of around USD 1 bn before 2024

Senior unsecured redemptions USD 17 bn 2022 to 2023 – far larger than SNP issuance plan

No net additional issuance needs, SNP will substitute part of senior unsecured issuance

Rare opportunity to invest in SSA senior non-preferred bonds

Few SSA's issuing SNP

Strong ownership with a public mission

- 100% owned by the Kingdom of Sweden, all Board Members are appointed by the owner
- SEK is a part of the Swedish government's export strategy and has an explicit public policy mandate to promote Swedish exports
- During periods when the market cannot satisfactorily supply financing to the Swedish export industry, the company is to constitute a tool whereby the government can take separate measures to ensure that such financing can be provided, like they did in 2009 to ensure financing to the export industry.
- This procedure was used again in the covid-19 crisis, demonstrated by an increased borrowing facility with the Swedish National Debt Office to Skr 200 billion from previous Skr 125 billion that in addition to state-supported export credits also can be used for commercial lending.

Senior
non-preferred bonds
will carry a yield
pickup compared to
senior unsecured
bonds
