- Operating profit Skr 1,618 million (9M25: Skr 1,459 million)
- C/I ratio 28 percent (9M25: 28 percent)
- After-tax return on equity 7.0 percent (9M25: 6.3 percent)
- Lending portfolio growth YTD 1.6 percent (9M25: -4.3 percent)
- New credit and guarantee commitments Skr 45.6 billion (9M25: Skr 97.4 billion)

July-September 2026

(July-September 2025)

- Net interest income Skr 717 million (3Q25: Skr 678 million)
- Operating profit Skr 527 million (3Q25: Skr 531 million)
- C/I ratio 24 percent (3Q25: 26 percent)
- After-tax return on equity 6.8 percent (3Q25: 7.1 percent)
- Lending portfolio growth QTD 1.3 percent (3Q25: -0.4 percent)
- New credit and guarantee commitments Skr 8.5 billion (3Q25: Skr 40.3 billion)

Equity and balances, September 30, 2026

(December 31, 2025)

- Total capital ratio 23.8 percent (year-end 2025: 23.1 percent)
– capital margin against FSA requirement 7.8 percentage points (year-end 2025: 7.1 percentage points)
- Total assets Skr 353.8 billion (year-end 2025: Skr 350.0 billion)
- Total lending portfolio Skr 266.8 billion (year-end 2025: Skr 262.7 billion)
– of which sustainability classified lending Skr 61.8 billion (year-end 2025: Skr 56.3 billion)
- Loans, outstanding and undisbursed Skr 342.3 billion (year-end 2025: Skr 344.3 billion)
- Outstanding senior debt Skr 308.6 billion (year-end 2025: Skr 304.6 billion)
– of which green borrowings Skr 23.5 billion (year-end 2025: Skr 27.8 billion)

Good profitability and strong financial position

SEK continues to report strong results with a return on equity of 7.0 percent for the first nine months of the year. The long-term needs for investments in competitiveness, security and transformation across the world are significant. At the same time, the market is characterized by geopolitical and trade policy uncertainty, which is contributing to companies holding off on major investment decisions. With a strong financial position, close customer relationships and a clear mission, SEK is well positioned to help make these investments a reality.

Strong results in the first nine months of the year

For the first nine months of the year, the return on equity amounted to 7.0 percent, compared to 6.3 percent in the corresponding period last year. In the first nine months of the year, net interest income increased by 3 percent to Skr 2,104 million compared to the same period in the previous year. The results in the first nine months of the year were also positively affected by reduced provisions for expected credit losses.

For the third quarter, the return on equity amounted to 6.8 percent. Profitability thus remains good, even though business activity was somewhat subdued during the quarter.

Global environment and market

The conditions for world trade are changing rapidly. Geopolitical unrest and trade policy uncertainty are, in some cases, making companies more cautious about major investments. Many companies are instead prioritizing strengthening their balance sheets and securing their liquidity. At the same time, the need for increased competitiveness, security and transformation is driving extensive investments. For Swedish export companies, this presents both challenges and new business opportunities.

During the third quarter, we saw weaker demand for long-term financing, while the availability of capital in the banking system was strong. In these market conditions, we continue to work closely with our customers, understand their long-term needs and, together with our partners, offer competitive financing solutions.

Strong investor interest in SEK's issuances

After the summer, the international capital markets were active, although market conditions were also characterized by unrest, rising long-term interest rates and periods of increased volatility. In early September, SEK carried out its second benchmark issuance of the year in US dollars. The issuance was met with strong interest from a broad international investor base, including central banks, public institutions and banks.

The strong investor interest is a testament to the confidence in SEK and our ability to secure long-term and competitive financing for Swedish export companies.

New vision for SEK

During the third quarter, SEK launched a new vision: *Stronger societies through the power of Swedish exports*.

The vision puts into words what is at the core of our mission and the societal benefit we contribute to. When Swedish companies grow internationally, they create jobs, innovation and investments that strengthen competitiveness and contribute to development both in Sweden and elsewhere in the world.

To realize our ambitions, we also need to continue to develop as an organization. During the quarter, we initiated a broad investment in self-leadership, learning and collaboration that involves all employees. By strengthening our shared capabilities and creating space for initiative and responsibility, we are building an organization that is well equipped for the future.

Future prospects

Short-term market conditions remain difficult to assess. Uncertainty may slow companies' decision-making processes and dampen demand for financing. At the same time, I am convinced that large investment needs will create significant opportunities for Swedish export companies and SEK.

Our task is to be a long-term financing partner, even when the world around us is uncertain. With our financial strength, our expertise and our close customer relationships, we are well placed to contribute to the competitiveness of the Swedish export industry and stronger societies through the power of Swedish exports.

Magnus Montan, CEO

New credit and guarantee commitments, quarterly
Skr bn

Customer business

During the third quarter, SEK signed new credit and guarantee commitments amounting to Skr 8.5 billion. The deals were executed in a market where companies' investment decisions take longer and competition for export credit financing remains high. During the first nine months of the year, new credit and guarantee agreements amounted to Skr 45.6 billion (9M25: Skr 97.4 billion). The decrease is mainly explained by lower volume of large export and project financing deals. At the end of the period, the lending portfolio amounted to Skr 266.8 billion (year-end 2025: Skr 262.7 billion). Committed undisbursed loans amounted to Skr 75.5 billion (year-end 2025: Skr 81.6 billion).

SEK continues to implement its growth strategy, which includes both developing business with existing customers and reaching more Swedish export companies and their customers. The quarter's new business largely consisted of operating financing.

One example during the third quarter is SEK's participation as one of the lenders in the refinancing of Scandic Hotels Group's long-term financing framework totaling approximately Skr 7.5 billion. The deal shows how SEK can further develop relationships with existing customers and provide long-term financing in cooperation with other market participants.

SEK continues to see significant investment needs in areas such as energy transition, infrastructure and defense. Close customer relationships give SEK a good understanding of companies' long-term needs and create the conditions to jointly develop financing solutions that enable future investments.

Borrowing

The international capital markets were active during August and September, while the market conditions were characterized by rising long-term interest rates and periods of increased volatility. In early September, SEK conducted its second benchmark issuance of the year in US dollars. The issuance amounted to USD 1.25 billion, matures in June 2031 and attracted more than 40 investors. The issuance was met with great interest from a broad international investor base, including central banks, public institutions and banks.

During the first nine months of the year, SEK's long-term new borrowing with a maturity of over one year amounted to Skr 63.7 billion (9M25: Skr 84.2 billion). The decrease is mainly attributable to a lower volume of new lending transactions, and thus a lower funding requirement.

At the end of the third quarter, the total borrowing portfolio amounted to Skr 308.6 billion, an increase of Skr 4.0 billion since the beginning of the year. SEK's broad global investor base provides favorable conditions for meeting financing needs even in a changing market situation.

Repurchase and redemption of own debt	9.7	4.6	7.2

¹ Balance at period end.

January-September 2026

Operating profit amounted to Skr 1,618 million (9M25: Skr 1,459 million). Net profit amounted to Skr 1,285 million (9M25: Skr 1,158 million). The increase in net profit compared to the same period in the previous year was primarily due to a positive result for net credit losses, higher net interest income and higher net results of financial transactions.

Net interest income

Net interest income amounted to Skr 2,104 million (9M25: Skr 2,050 million), representing an increase of 3 percent, compared to the same period in the previous year. The increase is mainly explained by a lower risk tax, while lower average short-term interest rates in the Swedish krona reduced the increase.

The table below shows average interest-bearing assets and liabilities.

Skr bn, average	Jan-Sep 2026	Jan-Sep 2025	Change
Total lending portfolio	264.8	277.3	-5%
Liquidity investments	65.7	66.0	0%
Interest-bearing assets	332.9	348.1	-4%
Interest-bearing liabilities	306.6	319.7	-4%

Net results of financial transactions

Net results of financial transactions amounted to a positive result of Skr 44 million (9M25: Skr 10 million). The results were primarily attributable to realized value changes of Skr 96 million, driven by early redemption of credits. Unrealized market value changes amounted to Skr -52 million, primarily related to the liquidity portfolio and currency revaluation effects.

SEK's general principle is to hold financial instruments measured at fair value until maturity. Accordingly, the results of market value changes tend to net toward zero over time.

Operating expenses

Operating expenses amounted to Skr 580 million (9M25: Skr 561 million), an increase of 3 percent, compared to the same period in the previous year. The increase was primarily attributable to increased personnel expenses, due to an increased number of employees following strategic initiatives.

Net credit losses

Net credit losses amounted to a positive result of Skr 66 million (9M25: Skr -13 million). The expected credit losses have decreased for exposures in all stages, primarily due to repayments.

Loss allowances as of September 30, 2026 amounted to Skr 779 million, compared to Skr 807 million as of December 31, 2025, of which exposures in stage 3 amounted to Skr 365 million (year-end 2025: Skr 359 million). The provision ratio amounted to 0.22

percent (year-end 2025: 0.23 percent). SEK assesses that the credit quality of its lending portfolio remains high.

Taxes

Tax costs amounted to Skr 334 million (9M25: Skr 301 million), and the effective tax rate amounted to 20.6 percent (9M25: 20.6 percent).

Other comprehensive income (OCI)

Other comprehensive income before tax amounted to a loss of Skr -71 million (9M25: Skr 12 million). The negative result was mainly attributable to own credit risk, primarily driven by changes in SEK's own credit spread in EUR.

July-September 2026

Operating profit amounted to Skr 527 million (3Q25: Skr 531 million). Net profit amounted to Skr 418 million (3Q25: Skr 421 million). A higher net interest income was offset by a lower positive result for net credit losses and a lower net results of financial transactions. As a result, both operating profit and net profit in the third quarter are largely unchanged, compared to the same period in the previous year.

Net interest income

Net interest income amounted to Skr 717 million (3Q25: Skr 678 million), representing an increase of 6 percent compared to the same period in the previous year. The majority of the increase is explained by a lower risk tax.

The table below shows average interest-bearing assets and liabilities.

Skr bn, average	Jul-Sep 2026	Jul-Sep 2025	Change
Total lending portfolio	265.1	271.7	-2%
Liquidity investments	74.9	71.8	4%
Interest-bearing assets	339.6	350.5	-3%
Interest-bearing liabilities	313.1	322.6	-3%

Net results of financial transactions

Net results of financial transactions amounted to Skr -15 million (3Q25: Skr 6 million). The results were primarily attributable to unrealized value changes of Skr -48 million, mainly related to inefficiency in hedging relationships and changes in currency basis swaps. Realized results amounted to Skr 32 million, related to early redemption of credits.

Operating expenses

Operating expenses amounted to Skr 174 million (3Q25: Skr 174 million). The operating expenses were unchanged compared to the same period in the previous year, with higher personnel expenses

being offset by lower costs for external projects, IT consultants and write-offs.

Net credit losses

Net credit losses amounted to a positive result of Skr 5 million (3Q25: Skr 25 million). The expected credit losses have decreased for exposures in stage 3, primarily due to revaluation, and increased for exposures in stage 1 due to new loan payments.

Taxes

Tax costs amounted to Skr 109 million (3Q25: Skr 110 million) and the effective tax rate amounted to 20.6 percent (3Q25: 20.7 percent).

Other comprehensive income (OCI)

Other comprehensive income before tax amounted to Skr 40 million (3Q25: Skr -46 million). The positive result was mainly attributable to changes in own credit risk, primarily driven by changes in SEK's own credit spread and market interest rates in EUR.

Statement of Financial Position

Total assets and liquidity investments

Total assets increased by 1 percent compared to year-end 2025. The increase in the period was driven by an increased volume of liquidity investments.

Skr bn	September 30, 2026	December 31, 2025	Change
Total assets	353.8	350.0	1%
Liquidity investments	66.4	65.0	2%
Total lending portfolio	266.8	262.7	2%
of which sustainability classified	61.8	56.3	10%
of which CIRR-loans	81.8	85.6	-5%

Liabilities and equity

As of September 30, 2026, the aggregate volume of available funds and shareholders' equity exceeded the aggregate volume of loans outstanding and committed undisbursed CIRR-loans at all maturities.

SEK has a credit facility in place with the Swedish National Debt Office of up to Skr 175 billion. The credit facility can be utilized when the Swedish export industry's demand for financing is particularly high.

Capital adequacy

As of September 30, 2026, SEK's total own funds amounted to Skr 23.7 billion (year-end 2025: Skr 23.1 billion). The total capital ratio was 23.8 percent (year-end 2025: 23.1 percent), representing a

margin of 7.8 percentage points above SEK's estimate of Finansinspektionen's (the "Swedish FSA") requirement of 16.1 percent as of September 30, 2026. The corresponding Common Equity Tier 1 capital estimated requirement was 11.3 percent. Given that SEK's own funds are comprised solely of Common Equity Tier 1 capital, this total capital ratio represents a margin of 12.6 percentage points above the requirement. Overall, SEK is strongly capitalized.

Percent	September 30, 2026	December 31, 2025
Common Equity Tier 1 capital ratio	23.8	23.1
Tier 1 capital ratio	23.8	23.1
Total capital ratio	23.8	23.1

Rating

	Skr	Foreign currency
Moody's	Aa1/Stable	Aa1/Stable
Standard & Poor's	AA+/Stable	AA+/Stable

Other events

At SEK's annual general meeting held on March 26, 2026, Mr. Reinhold Geijer stepped down from his position as a member of the Board of Directors of SEK (the "Board"), and Ms. Elisabeth Beskow was elected as a new member of the Board. Additionally, the Board passed a resolution at the annual general meeting to adopt the income statement and balance sheet in the Annual and Sustainability Report 2025 and to appropriate distributable funds pursuant to the Board's proposal.

In March, SEK appointed Ms. Anna Åhlberg as Head of Compliance and she assumed her new position in May 2026 when SEK's previous Head of Compliance, Ms. Anna-Lena Söderlund, retired.

In 2025, the European Commission published a simplification package (the "Omnibus package") relating to sustainability reporting. In 2026, the EU adopted amendments to the Corporate Sustainability Reporting Directive (CSRD) that limit its scope to companies and groups with more than 1,000 employees and net turnover exceeding EUR 450 million. The amendments are to be transposed into Swedish law by March 2027. SEK expects not to be subject to the reporting requirements once the new rules have been transposed into Swedish law.

Risk factors and the macro environment

SEK's operations are exposed to various types of risks, including primarily credit risks, but also market, liquidity, refinancing, operational and sustainability risks. For a more detailed description of these risks, refer to the separate risk report Capital Adequacy and Risk Management Report (Pillar 3) 2025, and the Risk and Capital Management section in SEK's Annual and Sustainability Report 2025.

In the second quarter of 2026, Sweden's GDP increased by 1.6 percent quarter-on-quarter, and exports increased by 1.0 percent. Unemployment amounted to 8.9 percent at the end of August 2026, which represented an increase compared to the end of May 2026. The rate of inflation in August 2026 was 0.7 percent, unchanged from July 2026.

In September 2026, the Riksbank announced that the policy rate would be left unchanged at 1.75 percent, but signaled that an interest rate hike in the fall is likely.

SEK believes that, compared with normal conditions, the risk level with respect to external factors with a potentially negative impact on the Company remains high as a result of ongoing armed conflicts and geopolitical tensions, which can negatively affect supply chains, increase inflation directly or indirectly through higher energy prices and create volatility in the financial markets. Long-term interest rates have also increased sharply worldwide during the third quarter. The major trade tariffs that the United States has imposed, or threatened to impose, on large parts of the world also contribute to the uncertainty in the financial markets. Although several agreements have been negotiated, reducing uncertainty to some extent, ongoing ambiguities in their interpretation, ongoing judicial review in the United States along with frequent new tariff announcements, mean that a degree of uncertainty persists.

The above mentioned threats, and the imposition of trade tariffs and other trade barriers by state actors, are reasonably likely to have a negative effect on international trade and have likely led to increased inflation, lower growth and thus potentially reduced demand for lending by SEK. At the other end of the scale, SEK believes there is a need for comprehensive infrastructure, energy and defense investments in Europe, which can create significant business opportunities for SEK.

SEK believes that information security threats, particularly in relation to cybersecurity, have increased and remain more acute than before as a consequence of Sweden's membership in NATO and its support for Ukraine.

The war in the Middle East and the resulting damage to energy and other infrastructure in Iran and across the region have led to significant volatility in global capital markets. The biggest impact has been the very limited traffic through the Strait of Hormuz, resulting in very volatile oil and gas prices. It is too early to assess what impact this will have on SEK. While SEK's direct exposure to such infrastructure is limited, it may be affected indirectly through wider macroeconomic effects, including higher energy prices, inflation and changes in market conditions. The increasingly high long-term interest rates worldwide also risk making projects unprofitable and generally reducing activity in the economy.

Russia's war in Ukraine has little direct financial impact on SEK. The Company has a gross exposure of EUR 2.2 million to one Russian counterparty, where the risk is 100 percent covered, and the exposure dates back to prior to the war breaking out. SEK has no exposure to Ukraine or Belarus. Nevertheless, the high level of uncertainty caused by Russia's war in Ukraine, as well as Russian air violations of NATO countries, sabotage and cybersecurity incidents, together with other ongoing military conflicts, including in the Middle East, could have a more long-term effect on SEK's customers and, consequently, on SEK. The uncertainty concerning the United States' future commitment to Europe and NATO and its support for Ukraine adds to the difficulty of predicting future developments.

Financial targets

Profitability target	A return on equity after tax of at least 5 percent over time.
Dividend policy	Payment of an ordinary dividend of 20-40 percent of the profit for the year.
Capital target	SEK's total capital ratio is to exceed the Swedish FSA's requirement by 2 to 7 percentage points and SEK's Common Equity Tier 1 capital ratio is to exceed the Swedish FSA's requirement by at least 4 percentage points. Currently, the capital targets mean that the total capital ratio should amount to 18.1-23.1 percent and the Common Equity Tier 1 capital ratio should amount to 15.3 percent, based on SEK's estimation of the Swedish FSA's requirements as of September 30, 2026.

Note 13. Events after the reporting period	26

References to “SEK” or the “Parent Company” are to Aktiebolaget Svensk Exportkredit. References to “Consolidated Group” are to SEK and its consolidated subsidiary. All figures relate to the Consolidated Group, unless otherwise indicated. All amounts are in Skr million, unless otherwise indicated. Amounts presented in this report have been rounded independently. Accordingly, totals may not equal the sum of individual amounts.

Note 1. Accounting policies

This condensed interim report is presented in accordance with International Accounting Standard (IAS) 34, Interim Financial Reporting. The Consolidated Group’s consolidated accounts have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), together with the interpretations from IFRS Interpretations Committee (IFRS IC). The IFRS standards applied by SEK are all endorsed by the European Union (EU). The accounting also follows the additional standards imposed by the Annual Accounts Act for Credit Institutions and Securities Companies (1995:1559) (ÅRKL) and the regulation and general guidelines issued by Finansinspektionen (the Swedish FSA), “Annual Reports in Credit Institutions and Securities Companies” (FFFS 2008:25). In addition to this, the supplementary accounting rules for groups (RFR 1) issued by the Swedish Corporate Reporting Board have been applied. SEK also follows the state’s principles for external reporting in accordance with its State Ownership Policy and principles for state-owned enterprises.

This condensed interim report of Aktiebolaget Svensk Exportkredit (publ) (Swedish Export Credit Corporation) (the “Parent Company”) has been prepared in accordance with the ÅRKL, and the RFR 2 recommendation, “Accounting for Legal Entities,” issued by the Swedish Corporate Reporting Board, as well as the accounting regulations of the Swedish FSA (FFFS 2008:25), which means that within the framework of the ÅRKL, IFRS has been applied to the greatest extent possible. The Parent Company’s results and total assets represent most of the results and total assets of the Consolidated Group, so the Consolidated Group’s information in these notes largely reflects the condition of the Parent Company.

The condensed interim report does not include all the disclosures required in the annual financial statements and should be read in conjunction with the company’s Annual and Sustainability Report for 2025.

(a) Changes to accounting policies and presentation

SEK analyzes and assesses the application and impact of changes in financial reporting standards that are applied within the Group. Changes that are not mentioned are either not applicable to SEK or have been determined to not have a material impact on SEK’s financial reporting, capital adequacy or large exposure ratios.

The accounting policies, methods of computation and presentation of the Consolidated Group and the Parent Company are, in all material aspects, the same as those used for the 2025 Annual and Sustainability Report.

(i) Standards issued but not yet effective

IASB has issued a new standard, IFRS 18 – Presentation and Disclosures in Financial Statements, which replaces IAS 1 – Presentation of Financial Statements. The standard has been endorsed by the EU and is effective for annual reporting periods beginning on or after 1 January 2027. IFRS 18 introduces new requirements for the presentation and disclosures in financial statements, with particular focus on the income statement and disclosures regarding management performance measures. Since the standard does not affect the classification and measurement of assets and liabilities, no material impact on SEK’s financial statements is expected.

Note 2. Net interest income

Skr mn	Jul-Sep 2026	Apr-Jun 2026	Jul-Sep 2025	Jan-Sep 2026	Jan-Sep 2025	Jan-Dec 2025

Note 4. Impairments

Skr mn	Jul-Sep 2026	Apr-Jun 2026	Jul-Sep 2025	Jan-Sep 2026	Jan-Sep 2025	Jan-Dec 2025
Expected credit losses, stage 1	-4	5	18	11	-11	-19
Expected credit losses, stage 2	0	32	11	38	6	-293
Expected credit losses, stage 3	9	24	-4	15	-2	-112
Established credit losses	—	-2	—	-2	-100	-100
Reserves applied to cover established credit losses	—	2	—	2	93	94
Recovered credit losses	0	0	0	1	1	1
Net credit losses	5	61	25	66	-13	-429

Skr mn	September 30, 2026				December 31, 2025
	Stage 1	Stage 2	Stage 3	Total	Total
Loans, before expected credit losses	224,923	37,176	5,517	267,616	263,517
Off-balance sheet exposures, before expected credit losses	75,068	13,538	—	88,606	91,520
Total, before expected credit losses	299,992	50,714	5,517	356,222	355,038
Loss allowance, loans	-58	-355	-365	-777	-805
Loss allowance, off-balance sheet exposures ¹	-2	0	—	-2	-2
Total loss allowance	-60	-355	-365	-779	-807
<i>Provision ratio (in percent)</i>	<i>0.02</i>	<i>0.70</i>	<i>6.61</i>	<i>0.22</i>	<i>0.23</i>

¹ Recognized under provision in Consolidated Statement of Financial Position. Off-balance sheet exposures consist of guarantee commitments and committed undisbursed loans, see Note 9.

The table above shows the book value of loans and nominal amounts for off-balance sheet exposures before expected credit losses for each stage as well as related loss allowance amounts, in order to place expected credit losses in relation to credit exposures. Overall, the credit portfolio has an extremely high

credit quality and SEK often uses risk mitigation measures, primarily through guarantees from the Swedish Export Credit Agency (EKN) and other government export credit agencies in the Organisation for Economic Co-operation and Development (OECD), which explains the low provision ratio.

Loss Allowance

Skr mn	September 30, 2026				December 31, 2025

Closing balance	-60	-355	-365	-779	-807

¹ Recognized under net results of financial transactions in Statement of Comprehensive Income.

Provisions for expected credit losses (ECLs) are calculated using quantitative models based on inputs, assumptions and methods that are highly reliant on assessments. In particular, the following could heavily impact the level of provisions: the establishment of a material increase in credit risk, allowing for forward-looking macroeconomic scenarios, and the measurement of both ECLs over the next 12 months and lifetime ECLs. ECLs are based on objective assessments of what SEK expects to lose on the exposures given what was known on the reporting date and taking into account possible future events. The ECL is a probability-weighted amount that is determined by evaluating the outcome of several possible scenarios and where the data taken into consideration comprises information from previous conditions, current conditions and projections of future economic conditions. SEK's method entails three scenarios being prepared for each

probability of default curve: a base scenario, a downturn scenario, and an upturn scenario, where the scenarios are expressed in a business cycle parameter. The business cycle parameter reflects the general risk of default in each geographic segment. The business cycle parameter follows a standard normal distribution where zero indicates a neutral economy as the economy has been on average, historically. The business cycle parameters for the base scenario are between 0.1 and 0.8 for the various probability of default (PD) segments. The base scenarios have been weighted at 60 percent, the downturn scenarios have been weighted at between 30 and 40 percent, and the upturn scenarios have been weighted at between 0 and 10 percent between the different PD-segments.

Determination of fair value

The determination of fair value is described in the annual financial statements included in SEK's Annual and Sustainability Report 2025, see Note 1 (f) (vii) Principles for determination of fair value

of financial instruments and (viii) Determination of fair value of certain types of financial instruments.

Financial assets in fair value hierarchy

Skr mn	Financial assets at fair value			
	Level 1	Level 2	Level 3	Total
Treasuries/governments bonds	1,077	6,337	–	7,414
Other interest-bearing securities except loans	26,830	18,800	–	45,630
Derivatives	–	9,004	0	9,004
Total September 30, 2026	27,907	34,141	0	62,048
Total December 31, 2025	22,215	41,161	1	63,377

Financial liabilities in fair value hierarchy

Skr mn	Financial liabilities at fair value			
	Level 1	Level 2	Level 3	Total
Debt securities issued	–	17,387	938	18,325
Derivatives	–	4,133	566	4,699
Total September 30, 2026	–	21,520	1,503	23,024
Total December 31, 2025	–	22,186	3,662	25,848

Transfers of Skr 344 million for debt securities issued and Skr 71 million for derivatives were made from level 3 to level 2, since the valuation of these contracts is estimated to no longer have a

significant impact from unobservable market data (year-end 2025: no transfers during the period).

Financial assets and liabilities at fair value in Level 3, 2026

Skr mn	January 1, 2026	Purchases	Settlements & sales	Transfers to Level 3	Transfers from Level 3	Gains (+) and losses (-) through profit or loss ¹	Gains (+) and losses (-) in other comprehensive income	Exchange rate differences	September 30, 2026
Debt securities issued	-2,598	–	1,295	–	344	114	10	-102	-938
Derivatives, net	-1,063	–	578	–	71	-110	–	-42	-565
Net assets and liabilities	-3,661	–	1,873	–	415	4	10	-143	-1,503

Financial assets and liabilities at fair value in Level 3, 2025

Skr mn	January 1, 2025	Purchases	Settlements & sales	Transfers to Level 3	Transfers from Level 3	Gains (+) and losses (-) through profit or loss ¹	Gains (+) and losses (-) in other comprehensive income	Exchange rate differences	December 31, 2025
Debt securities issued	-3,452	–	414	–	–	-32	-22	494	-2,598
Derivatives, net	-1,451	–	174	–	–	22	–	192	-1,063
Net assets and liabilities	-4,903	–	588	–	–	-10	-22	686	-3,661

¹ Gains and losses through profit or loss, including the impact of exchange rates, is reported as net interest income and net results of financial transactions. The unrealized fair value changes for assets and liabilities, including the impact of exchange rates, held as of September 30, 2026, amounted to a Skr 2 million gain (year end 2025: Skr 10 million loss) and are reported as net results of financial transactions.

Uncertainty of valuation of Level 3 instruments

As the estimation of parameters included in the models used to calculate the market value of Level 3 instruments is associated with subjectivity and uncertainty, SEK has conducted an analysis of the difference in fair value of Level 3 instruments using other established parameter values. Option models and discounted cash flows are used to value the Level 3 instruments. For the Level 3 instruments that are significantly affected by different types of correlations, which are not based on observable market data, a revaluation has been made by shifting the correlations. The correlation is expressed as a value between 1 and -1, where 0 indicates no relationship, 1 indicates a maximum positive relationship and -1 indicates a maximum negative relationship. The maximum correlation in the range of unobservable inputs can thus be from 1 to -1. In the analysis, the correlations have been adjusted by +/- 0.12, which represents the level SEK uses within its prudent valuation framework. The analysis shows the impact of the non-observable market data on the market value. In addition, the market value will be affected by observable market data. The

result of the analysis corresponds with SEK's business model where issued securities are linked with a matched hedging derivative. The underlying market data is used to evaluate the issued security as well as to evaluate the fair value in the derivative. This means that a change in fair value of the issued security, excluding SEK's own credit spread, is offset by an equally large change in fair value in the derivative.

Sensitivity analysis – level 3 assets and liabilities

Assets and liabilities	September 30, 2026					
	Fair Value	Unobservable input	Range of estimates for unobservable input	Valuation method	Sensitivity max	Sensitivity min
Skr mn						
Equity	0	Correlation	0.12 - (0.12)	Option Model	0	0
Interest rate	0	Correlation	0.12 - (0.12)	Option Model	0	0
FX	-469	Correlation	0.12 - (0.12)	Option Model	-6	6
Other	-96	Correlation	0.12 - (0.12)	Option Model	0	0
Sum derivatives, net	-565				-6	6
Equity	0	Correlation	0.12 - (0.12)	Option Model	0	0
Interest rate	0	Correlation	0.12 - (0.12)	Option Model	0	0
FX	-843	Correlation	0.12 - (0.12)	Option Model	6	-6
Other	-95	Correlation	0.12 - (0.12)	Option Model	0	0
Sum debt securities issued	-938				6	-6
Total effect on total comprehensive income					0	0
Derivatives, net December 31, 2025	-1,063				-17	17
Debt securities issued December 31, 2025	-2,598				27	-27
Total effect on total comprehensive income December 31, 2025					10	-10

The sensitivity analysis shows the effect that a shift in correlations has on Level 3 instruments. The table presents maximum positive and negative change in fair value when correlations or SEK's own credit spread is shifted by +/- 0.12. When determining the total

maximum/minimum effect on total comprehensive income the most adverse/favorable shift is chosen, considering the net exposure arising from the issued securities and the derivatives, for each correlation.

Fair value related to credit risk

Skr mn	Fair value originating from credit risk (- liabilities increase/ + liabilities decrease)		The period's change in fair value originating from credit risk (+ income/- loss)	
	September 30, 2026	December 31, 2025	Jan-Sep 2026	Jan-Sep 2025
CVA/DVA, net ¹	-13	-11	-2	3
OCA ²	215	282	-67	9

¹ Credit value adjustment (CVA) and Debt value adjustment (DVA) reflects how the counterparties' credit risk as well as SEK's own credit rating affects the fair value of derivatives.

² Own credit adjustment (OCA) reflects how the changes in SEK's credit rating affect the fair value of financial liabilities measured at fair value through profit and loss.

Note 6. Derivatives

Derivatives by category

Skr mn	September 30, 2026			December 31, 2025		
	Assets Fair value	Liabilities Fair value	Nominal amounts	Assets Fair value	Liabilities Fair value	Nominal amounts

Total derivatives	9,004	4,699	702,556	6,721	8,988	650,807

In accordance with SEK's policies with regard to counterparty, interest rate, currency exchange, and other exposures, SEK uses, and is a party to, different kinds of derivative instruments, mostly various interest rate-related and currency exchange-related

contracts, primarily to hedge risk exposure inherent in financial assets and liabilities. These contracts are carried at fair value in the statements of financial position on a contract-by-contract basis.

Note 8. CIRR-system

Pursuant to the company's assignment as stated in its owner instruction issued by the Swedish government, SEK administers credit granting in the Swedish system for officially supported export credits (CIRR-system). SEK receives compensation from the Swedish government in the form of an administrative compensation, which is calculated based on the principal amount outstanding. The administrative compensation paid by the state to SEK is recognized in the CIRR-system as administrative remuneration to SEK. Refer to the following tables of the

statement of comprehensive income and statement of financial positions for the CIRR-system, presented as reported to the owner. Interest expenses include interest expenses for loans between SEK and the CIRR-system which reflects the borrowing cost for the CIRR-system. Interest expenses for derivatives hedging CIRR-loans are also recognized as interest expenses, which differs from SEK's accounting principles. Arrangement fees to SEK are recognized together with other arrangement fees as interest expenses.

Note 10. Capital adequacy and liquidity situation

The capital adequacy analysis relates to the parent company Aktiebolaget Svensk Exportkredit. The information is disclosed according to FFFS 2014:12, FFFS 2008:25 and FFFS 2010:7. For further information on capital adequacy and risks, see the section entitled "Risk and capital management" in SEK's Annual and Sustainability Report 2025 and see SEK's Capital Adequacy and Risk Management (Pillar 3) Report 2025.

Capital Adequacy Analysis

Total risk-based capital requirement including Pillar 2 guidance	15,971	16.1	16,071	16.1

¹ Expressed as a percentage of total risk exposure amount.

² The minimum requirements according to CRR (Regulation (EU) No 575/2013 of the European Parliament and of the Council of June 26, 2013, on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012).

³ Individual Pillar 2 requirement of 3.01 percent calculated on the total risk exposure amount, according to the decision from the latest Swedish FSA Supervisory Review and Evaluation Process ("SREP") on September 30, 2025.

⁴ Common Equity Tier 1 capital available to meet buffer requirement after 8 percent minimum capital requirement (SEK covers all minimum requirements with CET1 capital, that is 4.5 percent, 1.5 percent and 2 percent) and after the Pillar 2 requirements (3.01 percent).

⁵ The Swedish FSA notified SEK on September 30, 2025, within the latest SREP, that in addition to the capital requirements according to Regulation (EU) no 575/2013 on prudential requirements, SEK should hold additional capital (Pillar 2 guidance) of 1.00 percent of the total risk-weighted exposure amount. The Pillar 2 guidance is not a binding requirement.

Leverage ratio ¹	September 30, 2026	December 31, 2025
	Skr mn	Skr mn
On-balance sheet exposures	239,366	236,953
Off-balance sheet exposures	5,125	7,161
Total exposure measure	244,492	244,114
Leverage ratio²	9.7%	9.5%

¹ The leverage ratio reflects the full impact of IFRS 9 as no transitional rules were utilized.

² Defined by CRR as the quotient of the Tier 1 capital and an exposure measure.

Total Leverage ratio requirement	September 30, 2026		December 31, 2025

1 Exposure at default (EAD) shows the size of the outstanding exposure at default.

2 Of which counterparty risk in derivatives: EAD Skr 4,069 million (year-end 2025: Skr 5,145 million), Risk exposure amount of Skr 780 million (year-end 2025: Skr 1,059 million) and Capital requirement of Skr 62 million (year-end 2025: Skr 85 million).

3 Of which related to specialized lending: EAD Skr 8,937 million (year-end 2025: Skr 8,258 million), Risk exposure amount of Skr 9,410 million (year-end 2025: Skr 8,473 million) and Capital requirement of Skr 753 million (year-end 2025: Skr 678 million).

Credit risk

For classification and quantification of credit risk, SEK uses the internal ratings-based (IRB) approach. Specifically, SEK applies the Foundation Approach. Under the Foundation Approach, the company determines the PD within one year for each of its counterparties, while the remaining parameters are established in accordance with CRR. Application of the IRB approach requires the Swedish FSA's permission and is subject to ongoing supervision. Certain exposures are, by permission from the Swedish FSA, exempted from application of the IRB approach, and, instead, the standardized approach is applied. Counterparty risk exposure amounts in derivatives are calculated in accordance with the standardized approach for counterparty credit risk.

Credit valuation adjustment risk

Credit valuation adjustment risk is calculated for all over-the-counter derivative contracts, except for credit derivatives used as credit protection and transactions with a qualifying central counterparty. SEK calculates this capital requirement according to the standardized approach.

Foreign exchange risk

Foreign exchange risk is calculated according to the standardized approach, whereas the scenario approach is used for calculating the gamma and volatility risks.

Commodities risk

Capital requirements for commodity risk are calculated in accordance with the simplified approach under the standardized

approach. The scenario approach is used for calculating the gamma and volatility risks.

Operational risk

SEK calculates the capital requirement for operational risks in accordance with the standardized approach in the CRR (Article 312 of Regulation (EU) 575/2013). The standardized approach is based on a Business Indicator Component (BIC), where the Company's Business Indicator (BI) is first calculated as the sum of three components: Interest, Leases and Dividend Component (ILDC), Services Component (SC), and Financial Component (FC). The BIC then forms the regulatory capital base for operational risks and is used to determine the capital requirement by applying standardized percentages set out in the regulation. For SEK, the BIC is multiplied by 12 percent.

Transitional rules

The capital adequacy ratios reflect the full impact of IFRS 9 as no transitional rules for IFRS 9 were utilized.

Capital buffer requirements

SEK expects to meet capital buffer requirements with Common Equity Tier 1 capital. The mandatory capital conservation buffer is 2.5 percent. The countercyclical buffer rate that is applied to exposures located in Sweden was increased from 1 percent to 2 percent as of June 22, 2023. As of September 30, 2026, the capital requirement related to relevant exposures in Sweden was 70 percent (year-end 2025: 71 percent) of the total relevant capital requirement regardless of location; this fraction is also the weight applied on the Swedish buffer rate when calculating SEK's countercyclical capital buffer. Buffer rates applicable in other countries may have effects on SEK, but as most capital requirements for SEK's relevant credit exposures are related to Sweden, the potential effect is limited. As of September 30, 2026, the contribution to SEK's countercyclical buffer from buffer rates in other countries was 0.17 percentage points (year-end 2025: 0.15 percentage points). SEK has not been classified as a systemically important institution by the Swedish FSA. The capital buffer requirements for systemically important institutions that came into force on January 1, 2016, therefore do not apply to SEK.

Liquidity reserve¹

Skr bn	September 30, 2026					December 31, 2025				
	Total	Skr	EUR	USD	Other	Total	Skr	EUR	USD	Other
Securities issued or guaranteed by sovereigns, central banks or multilateral development banks	24.2	6.0	4.4	13.8	—	33.0	6.0	11.2	15.8	—

Total liquidity reserve	53.4	22.7	10.8	19.8	—	57.2	22.4	12.7	22.1	—

¹ The liquidity reserve is a part of SEK's liquidity investments.

Information on Liquidity reserve is included in accordance with the Commission Delegated Regulation (EU) 2015/61.

Pillar 2 guidance

The Swedish FSA will in connection with the Supervisory Review and Evaluation Process (SREP) determine appropriate levels for the institution's own funds. The Swedish FSA will then inform the institution of the differences between the appropriate levels and requirements under the Supervisory Regulation, the Buffer Act and the Pillar 2 requirements. These notifications are called Pillar 2 guidance. The Pillar 2 guidance covers both the risk-based capital requirement and the leverage ratio requirement.

Liquidity coverage ratio

Skr bn, 12-month average	September 30, 2026	December 31, 2025
Total liquid assets	59.0	59.1
Net liquidity outflows ¹	13.9	10.3
<i>Liquidity outflows</i>	<i>25.4</i>	<i>22.9</i>
<i>Liquidity inflows</i>	<i>11.4</i>	<i>13.2</i>

Chief Executive Officer

SEK has established the following expected dates for the publication of financial information and other related matters:

January 26, 2027 Interim report for the period January 1, 2026 – December 31, 2026

The report contains information that SEK will disclose pursuant to the Securities Markets Act and/or the Financial Instruments Trading Act. The information was submitted for publication on October 20, 2026, 15:00 (CEST).

Additional information about SEK, including investor presentations and SEK's Annual and Sustainability Report 2025, is available at www.sek.se. Information available on or accessible through SEK's website is not incorporated herein by reference.

Report of Review of Interim Financial Information

To the Board of Directors of Aktiebolaget Svensk Export Credit Corporation (publ.) Corp Id No 556084-0315

Introduction

We have reviewed the condensed interim financial information (interim report) of Aktiebolaget Svensk Exportkredit (publ) as of September 30, 2026, and the nine-month period then ended. The board of directors and the CEO are responsible for the preparation and presentation of the interim report in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies. Our responsibility is to express a conclusion on this interim report based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements ISRE 2410, Review of Interim Report Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially

less in scope than an audit conducted in accordance with International Standards on Auditing, ISA, and other generally accepted auditing standards in Sweden. The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies, regarding the Group, and with the Annual Accounts Act for Credit Institutions and Securities Companies, regarding the Parent Company.

Stockholm, October 20, 2026
Öhrlings PricewaterhouseCoopers AB

Peter Sott
Authorized Public Accountant
Auditor in Charge

Alternative performance measures (see *) Alternative performance measures (APMs) are key performance indicators that are not defined under IFRS or in the Capital Requirements Directive IV (CRD IV) or in regulation (EU) No. 575/2013 on prudential requirements for credit institutions and investment firms (CRR). SEK has presented these, either because they are in common use within the industry or because they comply with SEK's assignment from the Swedish government. The APMs are used internally to monitor and manage operations, and are not considered to be directly comparable with similar key performance indicators presented by other companies. For additional information regarding the APMs, refer to www.sek.se.

***After-tax return on equity**

Net profit, expressed as a percentage per annum of the current year's average equity (calculated using the opening and closing balances for the report period).

Asset backed finance

Asset backed finance is financing in the form of leasing and installment purchases for export transactions, with the capital goods serving as collateral.

Available funds

Available funds is comprised of outstanding senior debt and credit facility in place with the Swedish National Debt Office.

***Average interest-bearing assets**

This item includes cash and cash equivalents, treasuries/government bonds, other interest-bearing securities except loans, loans in the form of interest-bearing securities, loans to credit institutions and loans to the public, and is calculated using the opening and closing balances for the reporting period.

***Average interest-bearing liabilities**

This item includes borrowing from credit institutions, borrowing from the public and debt securities issued and is calculated using the opening and closing balances for the reporting period.

Basic and diluted earnings per share (Skr)

Net profit divided by the average number of shares, which amounted to 3,990,000 for each period.

***C/I ratio**

Cost/income ratio. Operating expenses for the reporting period in relation to net interest income and net fee and commission expense. The C/I ratio aims to provide the reader with an understanding of SEK's cost-efficiency by showing operating expenses in relation to net income.

***CIRR loans as percentage of new lending**

The proportion of officially supported export credits (CIRR) of new lending.

CIRR-system

The CIRR-system comprises of the system of officially supported export credits (CIRR).

Common Equity Tier 1 capital ratio

The capital ratio is the quotient of total common equity tier 1 capital and the total risk exposure amount.

Green bond

A green bond is a bond where the capital is earmarked for various forms of environmental projects.

Green loans

SEK offers green loans that promote the transition to a climate-smart and environmentally sustainable economy. Green loans are categorized under SEK's framework for green bonds. The purpose is to stimulate green investments that are environmentally sustainable and contribute to one or more of the six environmental objectives in the EU taxonomy.

Leverage ratio

Tier 1 capital expressed as a percentage of the exposure measured under CRR (refer to Note 10).

Liquidity coverage ratio (LCR)

The liquidity coverage ratio is a liquidity metric that shows SEK's highly liquid assets in relation to the company's net cash outflows for the next 30 calendar days. An LCR of 100 percent means that the company's liquidity reserve is of sufficient size to enable the company to manage stressed liquidity outflows over a period of 30 days. Unlike the Swedish FSA's rules, the EU rules take into account the outflows that correspond to the need to pledge collateral for derivatives that would arise as a result of the effects of a negative market scenario.

Loans

Lending pertains to all credit facilities provided in the form of interest-bearing securities, and credit facilities granted by traditional documentation. SEK considers these amounts to be useful measurements of SEK's lending volumes. Accordingly, comments on lending volumes in this report pertain to amounts based on this definition.

*** Loans, outstanding and undisbursed**

The total of loans in the form of interest-bearing securities, loans to credit institutions, loans to the public and loans, outstanding and undisbursed. Deduction is made for cash collateral under the security agreements for derivative contracts and deposits with time to maturity exceeding three months (see the Statement of Financial Position and Note 9).

Net stable funding ratio (NSFR)

This ratio measures stable funding in relation to the company's illiquid assets over a one-year, stressed scenario in accordance with CRR II.

***New credit and guarantee commitments**

New credit and guarantee commitments refer to all new credits and guarantees accepted regardless of their maturity. Not all new credit and guarantee commitments

are reported in the consolidated statement of financial position and consolidated statement of cash flows, but a certain portion represents committed, undisbursed credits, see Note 9. The reported amounts of committed, undisbursed credits may change upon disbursement as they are reported in the statement of financial position, for example due to changes in exchange rates. Furthermore, committed credits do not necessarily result in a disbursement and thus a credit on the balance sheet. New credit and guarantee commitments are intended to provide the reader with a picture of the inflow of new business during the reporting period.

***New long-term borrowings**

New borrowings with maturities exceeding one year, for which the amounts are based on the trade date.

***Outstanding senior debt**

The total of borrowing from credit institutions, borrowing from the public and debt securities issued.

Own credit risk

Net fair value change due to credit risk on financial liabilities designated as at fair value through profit or loss.

Repurchase and redemption of own debt

The amounts are based on the trade date.

Social loans

Social loans are categorized according to SEK's "Sustainability bond framework". The purpose is to stimulate investments that are socially sustainable, such as in healthcare, education, basic infrastructure, or food security.

Sustainability classified loans

Sustainability classified loans refer to green, social and sustainability-linked loans.

Sustainability-linked loans

Sustainability-linked loans consist of working capital finance that promote the borrower's sustainability efforts, which in turn support environmental and socially sustainable economic activities and growth. SEK's sustainability-linked loans are based on International Loan Market Association's (LMA) Sustainability-Linked Loan Principles.

Swedish exporters

SEK's clients that directly or indirectly promote Swedish export.

Tier 1 capital ratio

The capital ratio is the quotient of total tier 1 capital and the total risk exposure amount.

Total capital ratio

The capital ratio is the quotient of total Own funds and the total risk exposure amount.

Unless otherwise stated, amounts in this report are in millions (mn) of Swedish kronor (Skr), abbreviated "Skr mn" and relate to the group consisting of the Parent Company and its consolidated subsidiary (together, the "Group" or the "Consolidated Group"). Aktiebolaget Svensk Exportkredit (SEK), is a Swedish corporation with the identity number 556084-0315, and with its registered office in Stockholm, Sweden. SEK is a public limited liability company as defined in the Swedish Companies Act. In some instances, under Swedish law, a public company is obliged to add "(publ.)" to its company name.

About Swedish Export Credit Corporation (SEK)

SEK is owned by the Swedish state, and since 1962 has enabled growth for thousands of Swedish companies. To expand their production, make acquisitions, employ more people and enable selling goods and services to customers worldwide.

SEK's mission

SEK's mission is to ensure access to financial solutions for the Swedish export industry on commercial and sustainable terms. SEK can finance the industry's transition in Sweden and abroad. The mission includes making available fixed-interest export credits within the officially supported CIRR-system.

SEK's vision

SEK's vision is stronger societies through the power of Swedish exports.

SEK's core values

We are a high performing team. Our mission and our ability to make an impact lead to pride and job satisfaction. We are Proactive Engaged Team players.

SEK's clients

We finance exporters, their subcontractors and foreign clients. The target group is companies with annual sales exceeding Skr 500 million and that are linked to Swedish interests and exports.

SEK's partnerships

Through Team Sweden, we have close partnerships with other export promotion agencies in Sweden such as Business Sweden and The Swedish Export Credit Agency (EKN). Our international network is substantial and we also work with numerous Swedish and international banks.
